

Figure 2 Estimating Current Number of Exempt Hillside Design District Sitework/Alteration Projects

Assumptions:

In order to estimate the current number of Hillside sitework/alteration projects exempt from design review, Staff divided the estimated number of alteration/sitework projects currently receiving design review (see Figure 3) by the number of Hillside Design District parcels with an 18% slope or greater. This ratio was then extrapolated to the number of Hillside Design District parcels with a slope of less than 18%. It is thus projected that 171 Hillside Design District sitework/alteration projects were exempt from design review in 2003.

Review Level	Estimated # of Projects in 2003
ABR	206
Admin.	133
Total	339

<u>339 estimated HDD sitework/alteration projects in 2003</u> 3868 HDD parcels with 18% or greater slope	<u>171 estimated exempt HDD sitework/alteration projects</u> = 1950 HDD parcels with less than 18% slope
